The Admissions Office
Ashesi University
PMB CT3, Cantonments
Accra, Ghana

Dear Sir/Madam,

Application for Financial Support

My name is Sonsori Abdu-Wasiu Issah. I am a student studying General science at Our Lady of Grace Senior High School. I humbly request your financial assistance to help fund my study for a degree in Computer Science at Ashesi University.

I come from a family where resilience and hard work are fundamental values. My father, a Magistrate and my mother a State Attorney work long hours and remain deeply committed to our family well-being. Yet, despite their efforts and sacrifices, their combined income often falls short of covering my school fees, especially with the added pressure of supporting my other siblings and extended relatives. Despite these challenges, my parents have instilled in me the importance of perseverance, gratitude, and the value of community support motivating me to pursue opportunities to make a difference.

My passion for technology began when I first used a computer in Junior High School. This sparked my interest in robotics, programming, and problem-solving. I actively engage in academic pursuits and extracurricular activities that align with my interests, all of which reinforce my commitment to excel. My long-term aspiration is to leverage the transformative power of software engineering to create innovative solutions that significantly impact my community and beyond. I am committed to acquiring the skills and knowledge necessary to harness technology for positive change in Ghana and Africa as a whole.

I strongly believe that education is key to transforming societies and solving local challenges. I am particularly drawn to Ashesi University because of its strong emphasis on ethical leadership, innovation, and hands-on learning. These values resonate with my mission to utilize technology to address pressing problems, such as healthcare inefficiencies and access to information. I am confident that pursuing my education at Ashesi will not only sharpen my technical skills but also enhance my personal growth as a responsible leader committed to serving others.

Ashesi University represents more than just an academic institution for me; it is a place where I can grow, lead, and innovate. The university's dedication to academic excellence and ethical engagement will equip me with the tools necessary to make meaningful contributions to the Ashesi community and the larger society. With your generous support, I am eager to embrace the challenges of university life and rise to the occasion, ultimately becoming a computer scientist who leaves a lasting, positive impact.

I am sincerely grateful for the opportunity to share my aspirations and express my need for support in achieving my educational goals. I firmly believe that with your assistance, I will be able to pursue my dream of becoming a computer scientist and empower others in underserved communities through technology.

Yours faithfully,
Sonsori Abdul-Wasiu Issah
